

UV- GC Portable Box

Description:

This durable and portable box is used to decontaminate material that has been exposed to bacteria, virus or other pathogens. Place material inside the box and expose to the UVC light for four to thirty minutes. This unit is equipped with a external door switch to allow minimal risk of exposure to skin and eyes. This unit also comes standard with a 120v cord and plug. TUV T8 lamps offer almost constant UV output over their complete lifetime, for maximum security of disinfection and high system efficacy.

Construction & Electrical:

Box is constructed of durable polypropylene. It is lined inside with a highly reflective mirror reflector. Unit is equipped with a one light T8 germicidal lamp and fixture.

Dimensions:

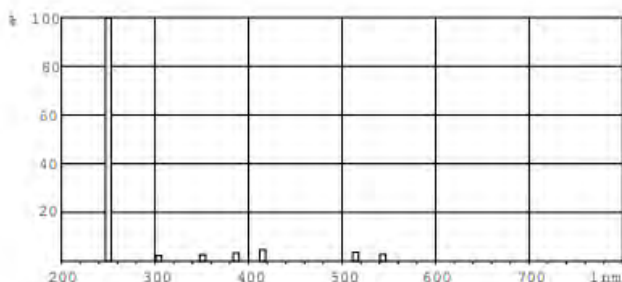

Inside: 16.5L x 8.5W x 7.75H

Outside: 19L x 10W x 9H

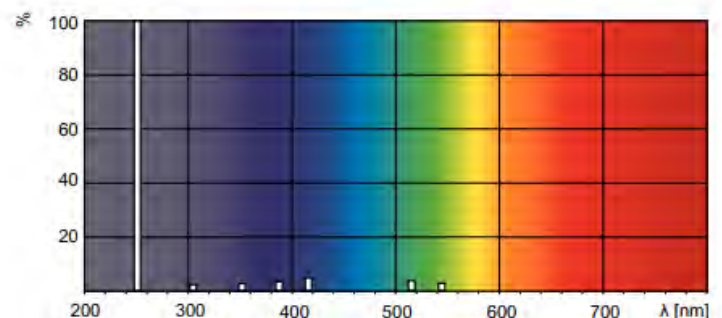

Constructed of durable polypropylene
