* ONLY AVAILABLE FOR 12 INCH FIXTURE

Installation:

Read and follow safety information

Turn off the main power at the circuit breaker before installing and servicing the fixture to prevent possible injury from electric shock.

All electrical connections must be in accordance with local and National Electrical Code (N.E.C.) standards. If you are unfamiliar with proper electrical wiring connections, obtain the services of a qualified electrician.

1. Pull the supply wires (4 & 5) and house ground wire (6) out from the outlet box (1);
2. Thread the fixture screws (8) into the appropriate threaded holes of the outlet box (1);
3. Electrical connections, connect the black fixture wire (10) to the black supply wire (5), the white fixture wire (9) to the white supply wire (4), and the fixture ground wire (11) to the house ground wire (6) using wire nuts (7);
4. Wrap all wire connections with electrical tape to ensure more secure connection and carefully tuck all wires back into the outlet box;
5. Place the fixture pan (2) over outlet box and feed fixture screws (8) through keyhole slots. Rotate the fixture pan (2) clockwise until screws (8) slid into the narrow end of the keyhole slots and tighten firmly;
6. Final assembly- Secure the diffuser (3) and the metal ring (12) to fixture pan (2) using three cap nuts (13);
7. Installation complete, restore power at the circuit breaker and turn light switch on to activate this fixture.

1. OUTLET BOX (EXCLUDED)
2. FIXTURE PAN
3. DIFFUSER
4. WHITE SUPPLY WIRE
5. BLACK SUPPLY WIRE
